

5:1 VPS Material Dispenser

Modulmix automatically mixes impression material for impressions prepared in 5:1 mixing ratio cartridges (362-380-390 ml). With respect to manual mixers, the Zhermack system automatic mixing is easy, constant and offers higher quality

modulmix

- Mixing phase is notably reduced to give more product working time
- Two expulsion speeds provide for expedited impression taking
- Compact and linear design which guarantees reduced space upon working surfaces
- Transparent plastic cover allows for immediate viewing of both the material being used as well as the level of material remaining in the cartridge
- Two expulsion button located on each side of the machine to facilitate the filling of the impression tray with two speeds (70 ml* per minute and 155 ml* per minute)
- Motorized forward and reverse motion of the finger-safe pistons to expedite cartridge substitution (max 3 seconds)
- Cartridge level indicator
- Modularity: The possibility to connect multiple machines in-line allows for the use of numerous materials simultaneously (heavy body – alginate replacement)
- Unit can be wall-mounted
- 2 year warranty

Customizable lateral panels to conform the machine to match any office decor.

Hi and Low speed button

Modular configuration for wall mounting

Modular configuration for the workstation

Easy access piston reverse button

MP39500

Ultimate Impression Package Includes:
